

THE MEDIA FELLOWS PROGRAM
-PRESENTS-

“40 Years Ago Today...”

In 1966 **The Beatles** helped Rock and Roll come into its own as an important new art form. Building on the styles and sounds that had come before them, **The Beatles** and others took Rock music in a new direction that still continues to evolve forty years later after becoming a defining part of our society.

Join IU’s “Doctor of Rock” Glenn Gass for an evening of reflection, Beatles lore and good music, as we examine the roots of Rock and Roll, and how it all started *40 Years Ago Today*.

DR. GLENN GASS

Professor of Music, IU
Composer, Musician and
Beatles Scholar

THIS EVENT IS FREE AND OPEN TO THE PUBLIC

7:30 p.m. in Watson Forum
Wednesday, April 26, 2006
